

BUYER'S GUIDE

WHAT ARE **WALKWAY PLANKS**?

Steel Walkway Planks are safe working platforms used in scaffolding systems for construction and industrial access. Manufactured from IS 2062 Grade E250 steel with anti-slip perforated surfaces, they provide excellent grip, durability and corrosion resistance.

Compatible with Ringlock, Cuplock, Tube-and-Coupler and Frame Scaffolding systems.

WHY STEEL WALKWAY PLANKS ARE BETTER THAN **TRADITIONAL WOODEN PLANKS**

Steel walkway planks offer superior safety, anti-slip performance, corrosion resistance and longer service life than wooden planks. They do not warp, crack or absorb moisture and are ideal for industrial environments.

TECHNICAL **SPECIFICATIONS**

Steel Grade	IS 2062 Grade E250
Deck Thickness	2 mm / 1.6 mm
Board Width	300 / 280 / 240 mm
Surface Finish	Hot Dip Galvanized

Service Life

8–15 Years

FACTORS TO CONSIDER BEFORE BUYING WALKWAY PLANKS

01. SURFACE GRIP

Choose anti-slip perforated surfaces for safe footing.

02. LOAD CAPACITY

Select planks with adequate safe working load.

03. CORROSION RESISTANCE

Hot-dip galvanized planks ensure longer service life.

04. COMPLIANCE

Choose planks complying with IS 3696, IS 4014 and EN ISO 1461.
